

CHAIRMAN

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

April 1, 1985

MEMORANDUM FOR: William J. Dircks
Executive Director for Operations
FROM: Nunzio J. Palladino *NJP*
SUBJECT: MCGUIRE TECHNICAL SPECIFICATIONS

By letter dated December 20, 1984 a significant amount of information was provided to Representative Markey on the above subject. Therein, you indicated that there does not appear to be a significant potential safety problem. I interpret that to mean that the staff continues to believe that its February 7, 1984 DPO Finding of no imminent safety problem remains valid given the additional staff review which has been done since early 1984.

Recently, the McGuire Technical Specifications have again been brought to my attention, and at this time I would like to obtain your schedule for the McGuire review. I believe you should establish a target date for final resolution and inform the Commission of that date by the end of this week. Please inform the Commission immediately if information becomes available which causes a revision to your previous no imminent safety problem finding.
