License No. SMC-1377

Gentlemen:

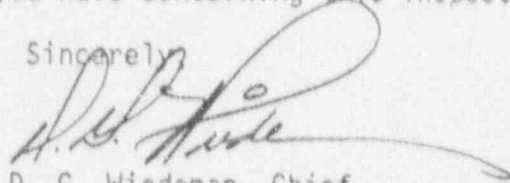

This refers to the special close-out inspection conducted on August 29, 1985, by D. R. Gibbons of this office, at your facility in East St. Louis, Illinois, conducted under NRC Source Material License No. SMC-1377. This also refers to the discussion of our finding with members of your staff at the conclusion of the inspection.

This was a special inspection to determine if any residual radiation, or radioactive contamination exists in the facility after the removal of all source material from the East St. Louis facility.

During this inspection, no items were identified that did not meet the guidelines in Regulatory Guide 1.86. In view of this, this office has no objection to the unrestricted use of this facility.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

D. G. Wiedeman, Chief  
Nuclear Materials Safety Section 1
