San Juan, PR 00936

Gentlemen:

SUBJECT: NRC INSPECTION REPORT NO. 52-01946-07/89-01

This refers to the Nuclear Regulatory Commission (NRC) special inspection conducted by Mr. E. Kline on March 16, 17, and 20, 1989, at the University of Puerto Rico. The special inspection included an evaluation of circumstances surrounding the occurrence of a therapeutic misadministration of a radiopharmaceutical on March 7, 1989. At the conclusion of the inspection, the findings were discussed with you and selected members of your staff.

Within the scope of the inspection, no violations or deviations were identified. However, on March 27, 1989, NRC Region II issued a Confirmation of Action letter documenting the specific corrective measures and actions you were taking to assure accurate determination of phosphorus-32 (P-32) doses administered to patients and compliance with established procedures.

In accordance with Section 2.790 of the NRC's "Rules of Practice", Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosure will be placed in the NRC Public Document Room.

Should you have any questions concerning this letter, please contact us.

Sincerely,  
**ORIGINAL SIGNED**  
**BY**  
**W. E. CLINE**

William E. Cline, Chief  
Nuclear Materials Safety and  
Safeguards Branch  
Division of Radiation Safety  
and Safeguards
