Docket 50-20

JUN 9 1958

Massachusetts Institute of Technology
Cambridge 30, Massachusetts

Attention: Mr. James McCormack
Vice President

Gentlemen:

Transmitted herewith is License No. R-37. The license authorizes possession and operation of the research reactor constructed at Cambridge, Massachusetts.

Also attached is a copy of findings made by the AEC in this matter.

By letter dated April 3, 1958, Dr. Manson Benedict suggested that the net yearly U-235 distribution figures shown in Appendix "A" be somewhat liberalized. Subsequent telephone conversation with Dr. Benedict has resulted in an understanding that at such time as operating experience provides a firm basis on which a new schedule can be based MIT will submit a formal request for appropriate amendment of its license. Meanwhile, Appendix "A" appears as published in the notice of proposed action.

Sincerely yours,

H. L. Price
Director
Division of Licensing and Regulation
