MONTHLY NARRATIVE REPORT
OF OPERATING
AND MAJOR MAINTENANCE EXPERIENCE

This report describes the operating and major maintenance experience for the month of July, 1982. This narrative report was prepared by the plant staff and is submitted in accordance with Section 6.9.1.10 of the plant Technical Specifications.

There is no significant operating experience or major safety-related maintenance to report.

No challenges to the PORV's or safety valves have been made. Furthermore, no changes have been made in the Offsite Dose Calculation Procedure or any radioactive waste treatment systems.

Revisions 1 and 2 of the Environmental Radiological Monitoring Procedure were reviewed and approved by the Plant Staff Review Committee on June 3, 1982, and June 18, 1982, respectively. A full report of these changes, as required by Section 6.14 of the Technical Specifications, is included as an attachment to this report.
