Gentlemen:

SUBJECT: NRC INSPECTION REPORT NOS. 52-01946-07/90-01 and
52-01946-09/90-01

This refers to the Nuclear Regulatory Commission (NRC) inspection conducted by Mr. L. Franklin and Mr. J. Pelchat on April 2 - 3, 1990, at your facility. At the conclusion of the inspection, the findings were discussed with Mr. Onelio Nunez, Dean of Administration.

The inspection was an examination of activities conducted under your licenses with respect to radiation safety and compliance with NRC regulations and the conditions of your license. It included selective examinations of procedures and representative records, interviews with personnel, and direct observations by the inspectors.

The inspection findings indicate that certain activities appeared to violate NRC requirements. The apparent violations described in the enclosed report are under consideration for escalated enforcement action. Accordingly, no Notice of Violation is being issued at this time. However, please be advised that the number and the character of the apparent violations described in the enclosed inspection report may change as the result of further NRC review. An Enforcement Conference to discuss these violations has been scheduled for May 3, 1990. Arrangements for this Conference will be confirmed by separate correspondence. You will be advised by separate correspondence of the results of our deliberations on this matter.

In accordance with Section 2.790 of the NRC's "Rules of Practice," Part 2, Title 10, Code of Federal Regulations, a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
