USNRC REGION II
ATLANTA, GEORGIA

On August 23, 1982, the supervisory alarm on the fire door separating the pipe chase and CRD pump area from the north stairwell went into alarm and would not clear. The continuous alarm was caused by a magnetic door switch which was out of adjustment. A Limiting Condition for Operation was entered pursuant to T.S.3.7.7. Attached is LER 82-057/03 L-0.

Yours truly,

J.P. McGaughy
