decontrolled

Enclosure 1 is unclassified

Dear Ms. Oshinowo:

This is in regard to your request dated September 13, 1993, for approval of a route to be used for transport of spent fuel from Portsmouth Marine Terminal, Portsmouth, Virginia; Norfolk International Terminal, Norfolk, Virginia; and Newport News Marine Terminal, Newport News, Virginia, to the DOE Savannah River Plant, Aiken, South Carolina. We included Lambert's Point, Norfolk, Virginia in our approval.

The route, as set forth in Enclosure 1, meets the regulatory requirements of 10 CFR 73.37. Enclosure 2 constitutes approval for this route. Unless renewed, this route approval will expire two years from the date of this letter. Note that transportation of licensed radioactive material must be conducted in compliance with the applicable U.S. Department of Transportation regulations.

NRC staff have completed the arrangements with law enforcement agencies required by 10 CFR 73.37(b)(6). Note that armed escorts are required for the following urbanized areas: Portsmouth, Chesapeake, Newport News, and Norfolk, Virginia; Fayetteville, North Carolina; and Columbia, South Carolina. Information on these arrangements is provided in Enclosure 2, and is to be incorporated into your shipment plans and provided to your carrier along with instructions regarding its use. If your carrier deviates from the approved route, please provide details of the deviation to the contact listed below as soon as possible.

The notification requirements of 10 CFR 73.37(f) and 73.72 apply for each shipment. When making notification to this office under 10 CFR 73.72, please confirm that armed escort will be provided as required, and that the appropriate governors or designees will or have been notified.

Should you require additional information or have questions concerning this matter, please contact John R. Cook of my staff at (301) 504-2458.

Sincerely,

Charles J. Haughney
