Docket No. 50-254
Docket No. 50-265

Commonwealth Edison Company
ATTN: Mr. Cordell Reed
Senior Vice President
Opus West III
1400 Opus Place
Downers Grove, IL 60515

Gentlemen:

This refers to the routine safety inspection conducted by Mr. T. Ploski and others of this office on August 27-31, 1990, of activities at the Quad Cities Nuclear Generating Station, Units 1 and 2, authorized by NRC Operating Licenses No. DPR-29 and No. DPR-30, and to the discussion of our findings with Mr. R. Robey and others of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

One non-cited violation of NRC requirements was identified during this inspection, involving the failure to provide periodic requalification training to six communicators within the required time limit. The violation was not cited because the licensee identified the problem during the inspection, made an adequate commitment to provide the training in a timely manner, and is continuing development of a longer term corrective action to prevent recurrence. No reply to the non-cited violation is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, your response and the enclosed inspection report will be placed in the NRC Public Document Room.
