Re: Removal of Cobalt-60 Teletherapy Source and Unit used
under License # 40-18000-02.

Gentlemen:

The Cobalt-60 Source, along with the Theratron-80 Teletherapy unit operated by St. Luke's Regional Medical Center of Aberdeen, South Dakota has been transferred to a broker. The date of equipment removal was August 15, 1990. Equipment was removed by personnel employed by X-Ray Equipment Company of Fort Worth Texas.

Prior to removal, the source was leaktested and found to have less than 0.005 uCi of removable contamination. After removal of equipment, the area was surveyed with a calibration checked GM type survey instrument. The survey revealed no exposure rate above background.

Enclosed is a copy of the source transfer document for your record. Please terminate the above stated license.

Thank You,

Joseph R. Gigant, Ph.D.
Radiation Safety Officer
