President and Chief Operating Officer
580 Main Street
Bolton, Massachusetts 01740-1398

Gentlemen:

Subject: Inspection Report No. 50-029/90-15

This refers to the routine safety inspection conducted by Mr. J. Furia of this office on August 27-30, 1990, of activities authorized by NRC License No. DPR-3 at the Yankee Nuclear Power Station, and to the discussions of our findings held by Mr. J. Furia with Mr. T. Henderson and other members of your staff at the conclusion of the inspection.

Areas examined during this inspection included transportation of radioactive materials and solid radwaste processing, as described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Within the scope of this inspection, no violations were observed.

Your program for the preparation, packaging and shipment of radwaste and other radioactive materials remains excellent. Notable strengths were identified in the areas of the radwaste staff, quality assurance and training.

Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By:
