Docket No. 50-219

GPU Nuclear Corporation
ATTN: Mr. Eugene E. Fitzpatrick
Vice President and Director
Oyster Creek Nuclear Generating Station
P. O. Box 388
Forked River, New Jersey 08731

Gentlemen:

Subject: Inspection Report No. 50-219/90-14

A routine, unannounced inspection of the radiological controls program at your facility was conducted by S. Sherbini on August 27 - 31, 1990. Areas covered during the inspection included changes in site organization and staffing, training, access control, dosimetry records, incident reports, and area posting and housekeeping. Also reviewed during this inspection were selected trends in total station exposures, contamination incidents, and similar parameters.

Within the scope of this inspection, no violations were identified. Significant improvements were noted in some of the areas inspected, particularly in training, the quality of incident reports, posting and housekeeping. Performance in the other areas inspected was good. An improving trend was found in all the performance parameters reviewed compared with the previous year. However, these improving trends are being viewed with caution because the figures for 1989 and 1990 do not represent periods of equal duration or work scope. However, we believe that these figures, taken together with observations made during this inspection, do indicate a significant improvement in radiological performance on site.

Your cooperation with us is appreciated.

Sincerely,

Original Signed By:
Ronald R. Bellamy
