Entergy Operations, Inc.  
ATTN: R. P. Barkhurst, Vice President  
Operations, Waterford  
P.O. Box B  
Killona, Louisiana 70066

Gentlemen:

This refers to the inspection conducted by Messrs. W. F. Smith, M. E. Murphy, and S. D. Butler of this office during the period July 16 through September 4, 1990, of activities authorized by NRC Operating License NPF-38 for Waterford Steam Electric Station, Unit 3, and to the discussion of our findings with Mr. J. R. McGaha and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included plant status, onsite followup of events, monthly maintenance observation, monthly surveillance observation, operational safety verification, licensee event report followup, and fire protection program followup. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The inspection findings are documented in the enclosed inspection report.

During this inspection, it was found that certain of your activities were in violation of NRC requirements. However, in accordance with Section V.A. of the NRC's Enforcement Policy, no citation is being issued for the violation described in paragraph 6 of the enclosed inspection report.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 7 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By

*Dwight Chamberlain*

Samuel J. Collins, Director  
Division of Reactor Projects
