Docket No. 50-247

Consolidated Edison Company of
New York, Inc.
ATTN: Mr. Stephen Bram
Vice President, Nuclear Power
Indian Point Station
Broadway and Bleakley Avenues
Buchanan, New York 10511

Gentlemen:

Subject: Inspection No. 50-247/90-18

This letter refers to the routine safeguards inspection conducted by Messrs. T. W. Dexter and E. B. King of this office on July 23-27, 1990, at Buchanan, New York, of activities authorized by NRC License No. DPR-26 and to the discussions of our findings held by Mr. Dexter with you and members of your staff at the conclusion of the inspection.

Areas examined during this inspection are described in the NRC Region I Inspection Report which is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel and observations by the inspectors.

Within the scope of this inspection, one non-cited violation was identified. This violation was not cited because it was self-identified, prompt corrective action was taken and meets the mitigative tests described in 10 CFR 2, Appendix C. In addition, one unresolved item and several potential weaknesses were identified that should receive attention to maintain the effectiveness of your security program. These are identified and discussed in the enclosed inspection report.

Sections of the enclosed report contain details of your program that have been determined to be exempt from public disclosure in accordance with 10 CFR 73.21 (Safeguards Information). Therefore, the sections so identified will not be placed in the NRC Public Document Room and will receive limited distribution. This letter and the remainder of the inspection report will be placed in the Public Document Room, in accordance with 10 CFR 2.790(a).
