REVIEW OF 3/22/82 REVISION OF DOE'S SUBMITTAL ON CRBR FUEL CYCLE SAFEGUARDS

The March 22 version of Amendment XIII appears to contain nearly all of the categories of information we need to perform our confirmatory review of CRBR fuel cycle safeguards. The only materials we are still missing are cost data for reprocessing safeguards, which DOE says it will submit by March 24, and information on measures to prevent SSNM theft from the reactor site. The latter should include both physical security and MC&A systems for protecting the unirradiated fuel.
