Trojan Nuclear Plant  
Docket 50-344  
License NPF-1

U.S. Nuclear Regulatory Commission  
ATTN: Document Control Desk  
Washington DC 20555

Dear Sirs:

License Change Application 203

Attached is one signed original of License Change Application (LCA) 203 requesting amendment of Operating License NPF-1. This LCA requests that a column entitled "Testable During Plant Operation" be deleted from Trojan Technical Specification (TTS) Table 3.6-1, "Containment Isolation Valves", and that a footnote in the table be applied to two additional valves. It is requested that this LCA be processed on an emergency basis to resolve a conflict between the column in Table 3.6-1 and TTS 4.7.1.2.1, "Auxiliary Feedwater System".

This LCA also incorporates valve number corrections requested in LCA 179, dated July 19, 1989, as well as several other editorial changes. It is therefore requested that LCA 179 be withdrawn in its entirety.

Furthermore, LCA 190, dated January 25, 1990, which requests the deletion of TTS Table 3.6-1, will be revised subsequent to your approval of this LCA.
