COMMENTS ON DRAFT SOCIOECONOMIC IMPACT ASSESSMENT FOR CRBR FUEL CYCLE

We have reviewed your draft assessment of the expected socioeconomic impact of the CRBR fuel cycle. We believe that the approach you have taken, a joint assessment for all fuel cycle activities, is appropriate. The socioeconomic impact of safeguards measures employed to protect the CRBR fuel cycle should be bounded by the analysis you have performed. As Davis Hurt discussed with you and Paul Leech on March 26, 1982, we are assuming that the socioeconomic impact of reactor safeguards will be included in NRR's portion of the environmental review.

Editorial comments are written in the margins of the attachment.
