Gentlemen:

This Confirms our plans as discussed between Mr. G. J. Maxfield of your staff and Mr. C. L. Vanderniet of this office to conduct an Enforcement Conference at 1:00 p.m., (CDT) on Thursday, October 4, 1990, at the Region III Office in Glen Ellyn, Illinois. The purpose of the Enforcement Conference is to discuss apparent violations concerning the electrical distribution system functional inspection and subsequent followup inspection. At the Enforcement Conference you should be prepared to discuss the topics listed in the enclosure.

We will gladly discuss any questions you may have concerning this matter.

Sincerely,

Original signed by W. T. Farney

Enforcement Conference Issues

1. To what extent could other components or systems be misclassified as non safety-related?
2. Do you have components or systems which are identified as safety related but do not get the full QA treatment? e.g., procurement, maintenance, procedures.
3. Had WEPCO initiated or proposed corrective actions as a result of its own audit findings that would have identified items found by the EDSFI?
4. Are there any piping systems, such as the EDG fuel oil piping system, that should have been considered by IEB 79-14 review?
5. Provide the safety significance, root cause, and corrective actions for all items identified in questions one (1) through four (4).
6. Be prepared to discuss your progress on the design basis reconstitution effort including findings and any other actions to resolve the noted weakness of lack of a available design and engineering information.
7. Be prepared to discuss your actions, such as SSFIs, to ensure functionality of other systems given the design deficiencies identified in the EDSFI.
