RE: License No. 13-18685-01

Gentlemen:

We are in receipt of the Confirmatory Action Letter which was stamped with the date of September 4, 1990.

It was stated at our meeting of August 29, 1990, that a Confirmatory Action Letter would be sent to us yet that week. We indicated at that time we felt a response to the letter could be presented within two (2) weeks. Thus, the date of September 14 was indicated as the target date for our response.

On September 4, 1990, I had a telephone conversation with Dr. Bruce Mallett. During the conversation we discussed the timing of our response. I indicated that because of the delay in receiving a written letter we probably would require an extension in the timing of our response.

The letter was first received by regular mail at our office on the afternoon of September 10, 1990.

I have reviewed the letter today and would like to discuss the details of this letter with Mark Alt prior to our response. However, Mr. Alt is on vacation this week.

Because of the delay of receiving the letter and the desire to discuss this matter with Mr. Alt, we are requesting an extension in the timing of our response to September 28, 1990.

If you have any questions, please contact us immediately.

Very truly yours,

ALT & WITZIG ENGINEERING, INC.
