Mr. Roy Caniano, Chief
Nuclear Materials Safety
U. S. Nuclear Regulatory Commission
799 Roosevelt Road
Glen Ellyn, Illinois 60137

**SECOND RESPONSE TO NOTICE OF VIOLATION,
LICENSE # 21-01443-06, DOCKET # 030-04794**

Dear Mr. Caniano:

In response to the June 29, 1990 Notice Of Violation concerning eating and drinking in restricted areas the following actions have been taken.

1. As described in our July 24 letter, senior management in each department was notified and asked to take appropriate actions to prevent further violations in their areas. The senior managers have informed they staff of the infraction and instructed them to comply with the no eating and drinking rule.
2. Senior mangers have also instituted audit procedures to monitor the restricted areas for infractions. Department supervisors or the department's Safety Committee will conduct quarterly inspections of restricted areas and inform department managers of any problems found and corrective actions taken.
3. The RSO will look for infractions during the quarterly radiation safety audits required by our License. Department managements will be inform if problems are found and the RSO will request written notification of corrective actions.

Parke-Davis is in compliance with License condition 23 referring to eating and drinking in areas where radioactive materials are used. Monitoring programs to prevent further violations are also in place.

Please contact me if these actions are not an acceptable response to the violation.

Thank You.

George Kreick
Safety Manager
Parke-Davis Research
