Licensee: Virginia Electric and Power Company
 Richmond, Va 23060

Docket Nos.: 50-338 and 50-339

License Nos.: NPF-4 and NPF-7

Facility Name: North Anna 1 and 2

Inspection Dates: August 27-31, 1990

Inspector: *Ernest M. Masarik for* 9-18-90
 E. L. Clay, Safeguards Engineer Date Signed

Approved By: *D. R. McGuire* 9/18/90
 D. R. McGuire, Chief Date Signed
 Safeguards Section
 Nuclear Materials Safety and Safeguards Branch
 Division of Radiation Safety and Safeguards

SUMMARY

Scope:

This routine, announced inspection entailed a review of procedures, records, operations, and physical inventory for use, control and accountability of special nuclear material (SNM).

Results:

One NCV was identified in the area of training. Training for all staff personnel associated with MC&A activities had not been completed (Paragraph 2). Except for training, the licensee was determined to be following all applicable NRC guidelines and was maintaining an adequate program for controlling and accounting for SNM in his possession and had limited the use of SNM to those areas authorized by license.
