General License
Reg. no. 1305
Docket no.
999-90003

Dear Mr. Caniano:

In response to your letter of August 21, 1990, we have discontinued use of the Yugoslavian material and in the future we will verify with supplier that their kits are approved for general NRC license before we purchase them. Licensee was unaware that kits were not approved for such use when we began to acquire kits. Evidently this was a misunderstanding between licensee and supplier. This experience will lead to avoid such mistakes in the future.

Very truly yours,

Joel I. Hamburger, M.D.
