

PRELIMINARY NOTIFICATION OF EVENT OR UNUSUAL OCCURRENCE--PNO-I-82-31C

This preliminary notification constitutes EARLY notice of events of POSSIBLE safety or public interest significance. The information is as initially received without verification or evaluation, and is basically all that is known by the Region I staff on this date.

Facility: Nine Mile Point, Unit 1  
DN 50-220  
Oswego, New York

Licensee Emergency Classification:  
 Notification of Unusual Event  
 Alert  
 Site Area Emergency  
 General Emergency  
 Not Applicable

Subject: LINEAR INDICATIONS IN REACTOR RECIRCULATION SYSTEM PIPING (UPDATE)

PNO-I-82-31B reported 8 ultrasonic (UT) indications in the Emergency Condenser System piping (10") and 4 UT indications in the Shutdown Cooling System piping (14"). This piping connects to the 28" Recirculation System piping.

Evaluation of these indications by the licensee showed that they are due to piping geometry, and therefore not reportable. UT examination of 26 additional welds in the Emergency Condenser, Core Spray, and Shutdown Cooling System has resulted in no reportable indications. Additional UT examinations are planned by the licensee.

The licensee does not plan to issue a press release. The NRC does not plan to issue a press release but will continue to respond to inquiries.

The State of New York has been notified.
