

UNC Recovery Sys.

Friday 9-14-90

Merri,

I have determined which USGS wells should be sampled at Wood River Junction. They are:

Well	Diam. (in.)	Depth (ft.)	Last Sr-90 conc. (pCi/L)	Last NO3-N conc. (mg/L)	Date
641	1.00	20	45	150	10-31-83
642	1.00	40	240	600	10-31-83
643	1.00	60	1.1	96	10-31-83
518	1.25	61	6.5	28	10-18-83
519	1.25	81	140	430	10-18-83
525	1.25	94	55	300	10-18-83

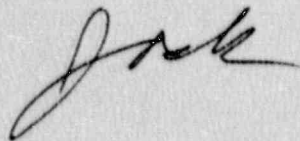

Alternates:

523	1.25	80	29	280	10-18-83
557	1.25	80	63	370	10-18-83
561	1.25	65	36	170	10-14-83

For comparison:

440 (77-B)	1.25	79	30	380	10-18-83
---------------	------	----	----	-----	----------

They are located on the attached map.

P.S. I will be on CWS Monday.

P.S.S. Charlie Haughney and I talked to Bob Gregg today. He gave us the name of the USGS person in Rhode Island to contact. Mr. Gregg is going to have his site person rig-up their pump so that it will pump the USGS wells.
