SEP 20 1990

Docket No. 50-461

Illinois Power Company  
ATTN: J. S. Perry  
Vice President  
Clinton Power Station  
Mail Code V-275  
P. O. Box 678  
Clinton, IL 61727

Gentlemen:

This refers to the routine Fitness for Duty inspection conducted by Messrs. T. J. Madeda and J. L. Belanger of this office on July 17-20, 1990, of activities at the Clinton Power Station authorized by NRC Operating License No. NPF-62 and to the discussion of our findings with you and other members of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, one item identified in your recent audit relating to random testing appeared to be in violation of NRC requirements. The inspection showed that actions are being taken to correct the identified violation and to prevent recurrence. Consequently, we have exercised our discretion as allowed under the NRC enforcement policy. Because we want to encourage prompt self-identification and correction of problems, the violation is not being cited because the criteria specified in 10 CFR Part 2, Appendix C, Section V.G of the Enforcement Policy were satisfied.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

L. Robert Greger, Chief  
Reactor Programs Branch

Enclosure: NRC Inspection Report
