Technical Specifications Change Request

Gentlemen:

PECO Energy Company is submitting Technical Specifications (TS) Change Request No. 92-05-0, in accordance with 10CFR50.90, requesting a change to the TS (i.e., Appendix A) of Operating License Nos. NPF-39 and NPF-85 for Limerick Generating Station (LGS), Units 1 and 2.

This TS Change Request involves increasing the surveillance interval for the functional test of the Reactor Protection System (RPS) electrical power monitoring channels, contained in TS section 4.8.4.3.a, from every six (6) months to each time the plant is in cold shutdown for a period of 24 hours, unless the test was performed in the previous six months. This TS Change Request is based on the guidance set forth in NRC Generic Letter 91-09 "Modification Of Surveillance Interval For The Electrical Protective Assemblies In Power Supplies For The Reactor Protection System."

The NRC has previously approved a similar request for Detroit Edison Company, Fermi 2, by letter dated December 27, 1991.

Information supporting this TS Change Request is contained in Attachment 1 to this letter, and the proposed replacement pages for the LGS, Unit 1 and Unit 2 TS are contained in Attachment 2.

We request that, if approved, this TS Change Request for LGS, Units 1 and 2, be effective upon issuance.
