Docket No. 72-009

SUBJECT: Security Plan for Proposed Independent Spent Fuel Storage  
Installation (ISFSI)

- REFERENCES: 1) PSC letter, Crawford to Roberts, dated June 22, 1990 (P-90173)
- 2) PSC letter, Crawford to Gaskins, dated July 20, 1990 (P-90232)

Dear Mr. Gaskins:

Public Service Company of Colorado (PSC) has submitted an application to license and construct an Independent Spent Fuel Storage Installation (ISFSI) to store spent fuel from the Fort St. Vrain Nuclear Generating Station (Reference 1). In Reference 2, PSC submitted a Physical Security Plan for the proposed ISFSI. Based on your discussions with members of PSC's staff, PSC has revised this submittal to address your comments.

This letter submits for staff review, the Revised Physical Security Plan (Attachment 1) which implements those requirements that PSC believes are applicable to an ISFSI. This submittal supercedes the plan submitted by Reference 2 which should therefore be withdrawn.

The material enclosed herewith contains Safeguards Information as defined by 10 CFR 73.21 and its disclosure to unauthorized individuals is prohibited by Section 147 of the Atomic Energy Act of 1954, as amended. Therefore, the material, with the exception of this letter should not be placed in the Public Documents room.
