Dear Mr. Hedegore:

This refers to the routine safety inspection conducted by Mr. W. Slawinski of
this office on February 24, 1994, of activities authorized by NRC Byproduct
Material License No. 34-26286-01, and to the discussion of our findings with
you and Mr. Baughman at the conclusion of the site inspection and to the
telephone conversation with you on March 29, 1994.

The inspection was an examination of activities conducted under your license
as they relate to radiation safety and to compliance with the Commission's
rules and regulations and with the conditions of your license. The inspection
consisted of a selective examination of procedures and representative records,
observations, independent measurements, and interviews with personnel.

In addition to the above areas, the inspector examined actions described
in your letter dated April 6, 1992, regarding a violation found during our
February 28, 1992 inspection. We have no further questions regarding these
matters.

During this inspection, certain of your activities were found to be in
violation of NRC requirements, as specified in the enclosed Notice. A
written response is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of
this letter, the enclosure, and your response to this letter will be placed
in the NRC Public Document Room.

The response directed by this letter and the accompanying Notice are not
subject to the clearance procedures of the Office of Management and Budget
as required by the Paperwork Reduction Act of 1980, PL 96-511.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,
