Dear B. J. Holt:

In response to our audit of January 25, 1994, the following is our response to findings "A" and "B".

- A. The reason for the finding was not entering the date for next inspection in my schedule book. As a result of this finding, I have scheduled all inspections for the year in the schedule book. This will be done at the start of each year. Full compliance with the requirements will be achieved immediately.
- B. The reason for the finding was my being on vacation during the month of December and not having the inspection scheduled in the schedule book. As in "A" above all inspections are now in my schedule book for the year and will preclude missing required inspections. Full compliance will be achieved immediately.

In you have any further questions, please contact me.

Sincerely,

Anthony J. Baures
