Re: Docket No: 40-8681
License: SUA-1358

Dear Mr. Hall:

The above-mentioned Source Material License requires an annual accounting of changes in land use. For the purposes of this report any change in the status of grazing, agricultural lands, residences, water wells or any other usage within a five (5) mile radius of the mill since August 1989 will be discussed.

1. The only land use change noted during the past year has been asphaltting the shirttail general store parking lot.

Except for the above-mentioned change, land use remains essentially as previously reported.
