SUMMARY

Scope:

This routine, unannounced inspection was conducted in the area of Physical Security Program for Power Reactors: specifically, Management Support; Security Organization; Security Program Plans; Audits; Protected Area Barriers; Detection Aids; Assessment Aids; Lights; Keys, Locks and Coml. ations; Alarm Stations; Communications and Security Power Supply.

Results:

In the areas inspected, one Inspector Followup Item (IFI) was identified as 90-30-01 (see paragraph 2.f.). A Defensive Position (Tower) did not have a clear view of an isolation zone. This IFI is similar to the violation cited in Inspection Report No. 50-327,328/90-15-01 dated April 26, 1990; the same Physical Security Plan paragraph and the same Defensive Position is involved. The inspector commented favorably on the security personnel's morale and professionalism.
