Docket #: 030-01954

License #: 20-12869-01

August 28, 1990

Nuclear Regulatory Commission
475 Allendale Road
King of Prussia, PA. 19406

SUBJECT: Routine Inspection #030-01945/90-001

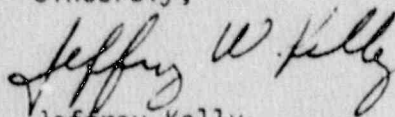

Gentlemen:

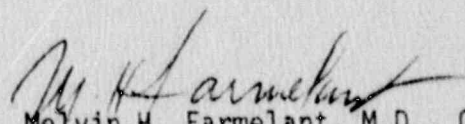

In the inspection of our facility on June 27, 1990, three non-compliance activities were noted.

- 1) Dose calibration constancy checks were being made only for ^{57}Co and ^{137}Cs . As of June 30, 1990 constancy checks are being performed for all frequently used radionuclides in conformity to Appendix D, Reg. Guide 10.8, Revision 1.
- 2) Area surveys of preparation and injection sites were not being performed on weekends. As of June 28, 1990 area surveys are being performed every day licensed material is used.
- 3) Prior to the inspection the date that byproduct material was placed in storage for disposal was not being recorded. As of June 30, 1990 the date of placing material in storage is now being recorded.

We believe that these corrective actions bring us into compliance.

Sincerely,

Jeffrey Kelly
Associate Vice President
Professional Services

Melvin H. Farmelant, M.D., Chairman
Radiation Safety Committee
