Docket Nos. 50-213

Mr. John F. Opeka
Executive Vice President - Nuclear
Connecticut Yankee Atomic Power Company
P.O. Box 270
Hartford, Connecticut 06141-0270

Dear Mr. Opeka:

Subject: NRC INSPECTION NO. 50-213/94-06

An announced safety inspection of the radiation protection program at your facility of activities authorized by NRC License No. DPR-61, was conducted by Mr. J. Furia of this office on March 28 - April 1, 1994. The inspection findings were discussed with Mr. J. Stetz and other members of your staff on March 31, 1994.

Areas examined during this inspection are important to health and safety and included the radiation protection program, as described in the NRC Region I Inspection Report that is enclosed with this letter. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector.

Continued strong performance in the radiation protection program was noted. Health Physics control of work activities was generally very good, and ALARA goals were generally being met. A strong program for dosimetry records and for instrument calibration was also observed.

No violations of NRC requirements or safety concerns were identified. No response to this letter is required.

Your cooperation with us in this matter is appreciated.

Sincerely,

Original Signed By;
James H. Joyner
