Gentlemen:

This refers to the inspection conducted by Messrs. L. E. Ellershaw and L. D. Gilbert of this office during the period September 6 and 10-14, 1990, of activities authorized by NRC Operating License NPF-87 and Construction Permit CPPR-127 for Comanche Peak Steam Electric Station, Units 1 and 2, and to the discussion of our findings with you and other members of your staff at the conclusion of the inspection.

The purpose of this inspection was to evaluate the fouling of the Unit 1 Train A component cooling water heat exchanger and to assess implementation of commitments made in response to Generic Letter 89-13. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The inspection findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,
Sig signed by
Dwight D. Chamberlain
Samuel J. Collins, Director
Division of Reactor Projects
