Docket Nos. 50-289
50-320

Mr. T. Gary Broughton
Vice President and Director, TMI
GPU Nuclear Corporation
Three Mile Island Nuclear Station
P. O. Box 480
Middletown, Pennsylvania 17057-0191

Dear Mr. Broughton:

SUBJECT: NRC COMBINED INSPECTION NOS. 50-289/94-06 AND 50-320/94-02

An unannounced safety inspection of your radiation protection program was conducted on March 15 - 18, 1994 at Three Mile Island Units 1 and 2 by Mr. J. Nick of this office, of activities authorized by NRC License Nos. DPR-50 and DPR-73. The results of this inspection were discussed by Mr. Nick with Messrs. Potts and Mehler and other members of your staff on March 18, 1994 at the conclusion of the inspection.

Areas reviewed during this inspection are important to health and safety and are discussed in the enclosed inspection report. These areas included review of planning and preparation for radiological activities, administrative controls, corrective action and self-assessment programs, external exposure control, personnel dosimetry, and required program documentation. Our findings were based upon inspector observations, interviews of personnel, and review of records.

Your radiological controls program was generally very effective in protecting the safety of workers in radiological areas. Areas toured in your facilities were generally well maintained and exhibited good housekeeping. Your staff has provided good program assessment with continuing improvements to the radiological controls program. A minor weakness was noted in identification/labeling information of radioactive materials and containers. Within the scope of this inspection, no safety concerns or violations of NRC regulatory requirements were identified. No response to this letter is required.
