Dear Dr. Uhrig:

The Commission has issued the enclosed Amendment No. 53 to Facility Operating License No. DPR-67 for St. Lucie Plant, Unit No. 1. The amendment consists of changes to the Appendix A Technical Specifications in response to your June 28, 1982 application.

This amendment deletes the current Technical Specification requirements to periodically test the insulation of certain Class 1E electrical underground cables for environmental damage.

Please note that the amendment does not delete the requirement to check the underground cable duct integrity after transit of a heavy load over it. This requirement is retained in the Technical Specifications.

A copy of the Safety Evaluation and the Notice of Issuance are enclosed.

Sincerely,

Eben L. Conner, Project Manager
 Operating Reactors Branch #3
 Division of Licensing
