

SEP 23 1982

Docket No. 50 346

Toledo Edison Company  
ATTN: Mr. Richard P. Crouse  
Vice President - Nuclear  
Edison Plaza  
300 Madison Avenue  
Toledo, Ohio 43652

Gentlemen:

On August 20, 1982, the Division of Licensing (DL) staff completed their review of your submittals dated July 15, July 30, August 6, and August 16, 1982 and issued a Safety Evaluation Report for the Davis-Besse Nuclear Power Station and authorization to resume power operation at the facility. These submittals related to once-through steam generator repairs and auxiliary feedwater system modifications. A Class III fee (\$4,000) was remitted with the July 30 submittal pursuant to 10 CFR 170.22.

Based on information provided by the DL staff as the result of their final review of your submittals, it has been determined that a Class IV fee (\$12,300) is appropriate for these submittals in lieu of the Class III (\$4,000) remitted since the review involved consideration of a complex issue. Therefore, you should remit the additional sum of \$8,300 to this office.

Sincerely,

Original Signed by:  
Reba M. Diggs

Reba M. Diggs
