Mr. Harold R. Denton, Director
Office of Nuclear Regulatory Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Perry Nuclear Power Plant
Docket Nos. 50-440; 50-441
Amendment 9

Dear Mr. Denton:

The Cleveland Electric Illuminating Company, acting on its own behalf and as agent for Toledo Edison, Ohio Edison, Duquesne Light, and Pennsylvania Power, is filing herewith three originals plus 60 copies of Amendment 9 to the Final Safety Analysis Report (FSAR) for the Perry Nuclear Power Plant, Units 1 and 2.

This Amendment consists of miscellaneous changes to update the FSAR and incorporates previously submitted responses to the Auxiliary Systems, Structural Engineering, Quality Assurance, Geotechnical, Effluent Treatment Systems, and Radiological Assessment Branch questions, revised per discussions with the staff. Also incorporated are revised FSAR sections 3.10 and 3.11 regarding qualification of mechanical and electrical equipment. Additionally, the Emergency Plan is hereby deleted from the FSAR as Appendix 13A and is submitted under separate cover. Revision 2 to the Fire Protection Evaluation Report is also submitted under separate cover.

This Amendment is in a format designed to keep current the license application and FSAR. Please insert the revised Amendment 9 material dated September 30, 1982, into the Final Safety Analysis Report as per the attached Amendment 9 Instruction Sheet.

Very truly yours,

Dalwyn R. Davidson
Vice President
System Engineering and Construction
