NOTICE OF VIOLATION

St. Louis Steel Casting, Inc.

License No. 24-01587-01

As a result of the inspection conducted on September 13, 1982, and in accordance with the NRC Enforcement Policy, 47 FR 9987 (March 9, 1982), the following violation was identified:

10 CFR 34.28(b) requires that the licensee conduct a program for inspection and maintenance of radiographic exposure devices, storage containers and source changers at intervals not to exceed three months. Records of these inspections and maintenance shall be kept for two years.

Contrary to this requirement, you have failed to perform an inspection and maintenance program of your exposure device and storage container at the proper intervals. Specifically, a review of records and statements from licensee representatives indicated the required inspections were not performed during the period from March 6, 1981 to the day of the NRC inspection, September 13, 1982, a period greater than three months.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, you are required to submit to this office within thirty days of the date of this Notice a written statement or explanation in reply, including for each item of noncompliance: (1) corrective action taken and the results achieved; (2) corrective action to be taken to avoid further noncompliance; and (3) the date when full compliance will be achieved. Consideration may be given to extending your response time for good cause shown.
