REVISING 10 CFR PART 100, REACTOR SITE  
CRITERIA

APPROVED X(w/comments) DISAPPROVED \_\_\_\_\_ ABSTAIN \_\_\_\_\_

NOT PARTICIPATING \_\_\_\_\_ REQUEST DISCUSSION \_\_\_\_\_

COMMENTS:

I approve the staff's recommended course of action, with the comments below and also agree with the thrust of the comments of the Chairman and Commissioner Rogers as modified by those of Commissioner Remick.

With respect to the public comment, I agree that both the seismic and non-seismic parts of this proposed rulemaking should be reissued for public comment as it appears that the revisions to the proposed rule and to the regulatory guidance documents may be significant. I would suggest that the length of the comment period be established when the Commission has the opportunity to see the actual rule language and guidance documents.

In addition, when the proposed rule is brought to the Commission, the staff should also provide sufficient detail in the seismic guidance documents to understand how decisions on the hybrid approach comparisons will be made.
