

APPENDIX A

NOTICE OF VIOLATION

Entergy Operations, Inc.
Waterford Steam Electric Station, Unit 3

Docket: 50-382
License: NPF-38

During an NRC inspection conducted on January 29 through March 5, 1994, one violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, the violation is listed below:

Criterion V of Appendix B to 10 CFR Part 50 requires that activities affecting quality be prescribed by documented instructions or procedures of a type appropriate to the circumstances and that the instructions or procedures include appropriate quantitative or qualitative acceptance criteria for determining that important activities have been satisfactorily accomplished.

Administrative Procedure HP-001-114, Revision 4, "Installation of Temporary Lead Shielding," provided instructions for the installation of temporary shielding.

Contrary to the above, on January 26, 1994, Procedure HP-001-114 was not appropriate in that the procedure did not include adequate acceptance criteria. As a result, temporary lead shielding structures were found to be contacting safety-related pipe support electrical conduit and a safety-related snubber.

This is a Severity Level IV violation. (Supplement I)

Pursuant to the provisions of 10 CFR 2.201, Entergy Operations, Inc. is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region IV, 611 Ryan Plaza Drive, Suite 400, Arlington, Texas 76011, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued to show cause why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.

Dated at Arlington, Texas,
this *12th* day of *April* 1994
