

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

April 08, 1994

Docket No. 70-1113
License No. SNM-1097

General Electric Company
ATTN: Mr. C. P. Kipp, General Manager
General Electric Nuclear Energy Production
P.O. Box 780
Wilmington, NC 28402

Dear Mr. Kipp:

SUBJECT: INSPECTION REPORT NO. 70-1113/94-201

The Nuclear Regulatory Commission conducted a routine inspection of your facility's material control and accounting (MC&A) safeguards program on March 14 - 18, 1994. The scope and results of the inspection are summarized in Enclosure 1 and the areas examined during the inspection are described in Enclosure 2.

The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress. At the conclusion of the inspection, the findings were discussed with members of your staff.

Within the scope of the inspection, one apparent violation was identified along with other concerns, identified as inspector follow-up items, that merit your attention. Although these issues do not indicate a significant decrease in the effectiveness of the safeguards program, they do reflect some weaknesses.

With regard to the violation, you are required to respond to this letter and should follow the instructions specified in the enclosed "Notice of Violation" (Enclosure 3) when preparing your response. In the response, you should document the specified actions taken for the violation and any proposed actions to prevent recurrence.

Under the provisions of Section 2.790(d), reports containing information related to a licensee's MC&A program are exempt from public disclosure. Accordingly, Enclosures 2 & 3 will not be placed in the public document room.
