Gentlemen:

SUPPLEMENTAL COMMITMENT IN RESPONSE TO BULLETIN 90-01
HOPE CREEK GENERATING STATION
DOCKET NO. 50-354

On July 18, 1990, Public Service Electric and Gas (PSE&G) provided NRC a response to Bulletin 90-01 via NLR-N90149. The enclosure to that response detailed a commitment to replace suspect transmitters manufactured by Rosemount in "Pressurized Service." This commitment specifically excluded seventeen transmitters in "Atmospheric Pressure Service."

After reevaluating the functions and redundancy of these seventeen transmitters, PSE&G has determined that it will replace these transmitters also. This will be accomplished within six months following the completion of the third refueling outage for the Hope Creek Station. This outage is currently scheduled for December 26, 1990 through February 13, 1991. All other commitments provided in our bulletin response are not affected by this change, and will be completed as previously indicated. If you have any questions regarding this supplement, please do not hesitate to call.

Sincerely,

9010300016 901018
