

MAY 06 1982

Docket No. 99900334/81-02

Transamerica Delaval, Incorporated  
Engine and Compressor Division  
ATTN: Mr. C. Mathews  
General Manager  
Oakland, CA 94621

Gentlemen:

Thank you for your letters of October 6, 1981, and January 28, 1982, in response to our letters dated September 18, 1981, and January 14, 1982.

In this correspondence you question the validity of Nonconformance Items C and D. We find this position unacceptable, in that you have no records which attest either to environmental qualification of the motors in question, or manufacture of the motors in accordance with your purchase order.

We have no specific concerns about the use of these motors, in that we have been informed that they will be replaced with qualified motors from another vendor. We are concerned, however, in regard to the adequacy of your QA program with respect to identification and implementation of procurement requirements. Accordingly, we plan to conduct an inspection in the near future to assess, in particular, your: (1) imposition of requirements on suppliers; (2) actions in regard to supplier conformance; and (3) records that reflect the aforementioned activities. The inspectors will be accompanied by a member of NRC Regional management for the purpose of reviewing NRC inspection history of your facility with you.

bcc: J. T. Collins
