Docket No. 50-368  
License No. NPF-6  
Snubber Inspection Extension  
Technical Specification Change Request

Gentlemen:

Attached for your review and approval is a proposed Technical Specification change to 3/4.7.8 Hydraulic Shock Suppressors (Snubbers) for ANO-2. The proposed change involves the visual inspection period for inaccessible snubbers.

The proposed change to the snubber visual inspection interval would allow the snubber inspection due between August 8, 1990 and February 6, 1991, to be delayed until the end of upcoming ANO-2 refueling outage (2R8) which is currently scheduled to begin February 17, 1991. This would prevent ANO-2 from being forced into shutdown condition specifically to perform the inspection of inaccessible snubbers. The snubbers will be inspected during the scheduled outage. Although the circumstances of this change are not exigent or emergency, expeditious handling of this change is requested.

In accordance with 10CFR50.91(a)(1), Entergy Operations has evaluated the proposed change using the criteria in 10CFR50.92(c) and has determined that said change involves no significant hazards consideration. The bases for this determination are attached.
