re: Procedure for Renewal of Research
Reactor Facility License

Dear Mr. Bernard:

You have assisted us in the past on licensing questions. We wonder if you could provide us with some guidance on the proper procedure for renewal of our 10 year Reactor Facility License No. R-94 which expires on September 30, 1983. As this is a college-based research and instructional facility licensed for only 0.1 watt, we trust that the renewal procedure is much less complicated than for a much larger facility. Thank you in advance for your help.

Very truly yours,

Ronald S. Kane
