SUBJECT: NRC REGION I INSPECTION NO. 50-333/94-06

This refers to the results of the routine resident safety inspection conducted by Messrs. W. Cook and J. Tappert from February 6, 1994 to March 12, 1994 at James A. FitzPatrick Nuclear Power Plant, Scriba, New York. A summary of the inspection findings was presented to you and members of your staff at the conclusion of the inspection.

This inspection was directed toward areas important to public health and safety. Areas examined during the inspection are described in the NRC Region I inspection report, which is enclosed with this letter. Within these areas, the inspection consisted of observation of activities, interviews with personnel, and document reviews.

Overall performance by the FitzPatrick staff was good during this inspection period. We noted that your enhanced work practices seminars held in response to some personnel performance problems during your fall outage were well conducted and productive. Work practice performance will be reviewed in the upcoming maintenance outage.

Your cooperation with us is appreciated.

Sincerely,
