

APPENDIX A

NOTICE OF VIOLATION

PECO Energy
Limerick Nuclear Generating Station
Unit 1

Docket No. 50-352
License No. NPR-39

During an NRC inspection conducted on February 15-18, 1994, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, the violation is listed below.

Technical Specification 6.11 requires adherence to radiation protection procedures.

Radiation Protection Procedure A-C-107, Revision 1, Radiation Work Permit Program and Radiological Controlled Area Access, states, in part, in Section 5.0, that all workers are responsible for complying with established postings in the radiological controlled area (RCA).

Contrary to the above, on February 2, 1994, an Instrument and Control (I&C) technician did not comply with established postings in the radiological controlled area. Specifically, the roof top area of the Unit 1 Traversing Incore Probe (TIP) area was posted as a "High Radiation Area, RWP Required For Entry," and the I&C technician entered and worked in the area for about four hours without obtaining the required radiation work permit (RWP).

This is a Severity Level IV Violation (Supplement IV).

Pursuant to the provisions of 10 CFR 2.201, Philadelphia Electric Company is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region I, and a copy to the NRC Resident Inspector at the facility that is the subject of this Notice, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued to show cause why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.
