Docket No. 50-309

Mr. John H. Garrity, Senior Directory
Nuclear Engineering and Licensing
Maine Yankee Atomic Power Company
83 Edison Drive
Augusta, Maine 04336

Dear Mr. Garrity:

The Commission has issued the enclosed Amendment No. 63 to Facility Operating License No. DPR-36 for the Maine Yankee Atomic Power Station. The amendment consists of changes to the Technical Specifications (TS) in response to your application dated March 26, 1975 and subsequently revised in letters dated January 27, 1977, March 19, 1980 and February 13, 1981.

This amendment changes the Technical Specifications, making the Limiting Conditions for Operation more restrictive and increasing the Surveillance Requirements for Ventilation and Filter System

Since the format for your technical specifications has changed since the time of your original submittal, Maine Yankee is requested to supply these TS sections in the new format as part of your next amendment request (e.g. Proposed Change No. 89.)

Copies of the Safety Evaluation and the Notice of Issuance are also enclosed.

Sincerely,

Handwritten signature
