SUBJECT: TMI-1 RESTART CERTIFICATION

Your memorandum of July 27, 1982 requested that we address NUREG-0737 requirement deferrals on TMI-1 as outlined in the Commission's March 23, 1981 Order (CLI-81-3). CLI-81-3 indicates that the Commission itself will consider the need for granting deferral for NUREG-0737 requirements on TMI-1 in reaching its decisions on immediate effectiveness and ultimate review of the Board's decision. CLI-81-3 also noted that such deferral would only be granted after hearing staff recommendations. The staff will request that the Licensee provide its updated schedule for implementation of NUREG-0737 requirements and justification for any schedule delay. After formulating recommendations on the licensee's implementation schedules, the staff expects to be prepared to brief the Commission on the staff's recommendations in late September 1982 before the Commission makes its decision on immediate effectiveness of the Board's initial decision.

REMARKS This package is okay (It goes to the Commission for their approval of the change of NUREG 0737 dates).

However, ^{the section} ~~our review of~~ ^(BORON) II.B.2.2. (Shielding) implies the question of whether the ~~Born~~ precip problem is a part of Long Term LOCA evaluation under 50.46 and Appl^K or part of Abundant Cooling under GDC 35 or whether it is "something else". If the problem affects conformance with the regulations, the deferral amounts to an exemption.

If it does not affect conformance with the regulations, it is a departure from NUREG 0737. Although the Commission can authorize either, you will need to come to some position on this ~~(we change our minds every time this issue arises)~~ so that the Commission has some idea of the nature of the kind of "deferral" this entails.

Please Bring Back for GHD
